| Completed on          | Tuesday, 6 April 2021, 6:46 PM                                 |
| Time taken            | 33 mins 52 secs  |
| Marks                 | 14.00/15.00  |
| Grade                 | 9.33 out of 10.00 (93%)  |
| Question 1            |  |
| Correct               |  |
| Mark 1.00 out of 1.00 |  |
|                       |  |
| Sensor proximity      | bekerja dengan menggunakan prinsip pantulan suara infra merah. |
| Select one:           |  |
| o a. Salah 🗸          |  |
| O b. Betul            |  |
| The correct ansv      | wer is: Salah  |

| Question 2   |
|--|
| Correct  |
| Mark 1.00 out of 1.00  |
|  |
|  |
| Sensor proximity bekerja dengan menggunakan prinsip pantulan sinar infra merah.                      |
| Select one:  |
| a. Salah   |
| ● b. Betul ✓   |
| b. Betti   |
|  |
| The correct answer is: Betul   |
|  |
|  |
| Question 3   |
| Correct  |
| Mark 1.00 out of 1.00  |
|  |
| Sensor proximity terdiri dari IR Receiver, IR Emitter berupa LED, komparator, dan resistor variabel. |
| Sensor proximity terain dan in necessary, in Emitter berapa EED, nomparator, dan resistor variable.  |
| Select one:  |
| a. Salah   |
| o b. Betul ✓   |
|  |
| The correct answer is: Betul   |
| The correct answer is: Betur   |
|  |
|  |
| Question 4   |
| Correct  |
| Mark 1.00 out of 1.00  |
|  |
| Sensor proximity dapat mengukur jarak antara 2cm hingga 30cm.  |
|  |
| Select one:  |
| o a. Salah ✓   |
| O b. Betul   |
|  |
| The correct engines in Colch   |
| The correct answer is: Salah   |

| Question 5   |
|--|
| Correct  |
| Mark 1.00 out of 1.00  |
|  |
| IR Receiver yang digunakan pada sensor proximity tidak lain adalah phototransistor.  |
|  |
| Select one:  |
| a. Salah   |
| ● b. Betul ・   |
| The correct answer is: Betul   |
|  |
| Question 6   |
| Correct  |
| Mark 1.00 out of 1.00  |
|  |
| Prinsip kerja dari rangkaian komparator sensor proximity adalah apabila sensor mengeluarkan tegangan melebihi tegangan referensi, maka keluaran dari komparator juga akan berlogika HIGH.      |
| Select one:  |
| o a. Salah ✓   |
| b. Betul   |
| D. Betui   |
| The correct answer is: Salah   |
|  |
| Question 7   |
| Incorrect  |
| Mark 0.00 out of 1.00  |
|  |
| Prinsip kerja dari rangkaian komparator sensor proximity adalah apabila sensor mengeluarkan tegangan lebih kecil dari<br>tegangan referensi, maka keluaran dari komparator akan berlogika LOW. |
| Select one:  |
| o a. Betul ×   |
| ○ b. Salah   |
|  |
| The correct answer is: Salah   |

| Question 8  |
|---|
| Correct   |
| Mark 1.00 out of 1.00   |
|   |
| Resistor variabel pada sensor proximity berfungsi untuk menentukan jarak yang objek yang akan dideteksi.  |
| Select one:   |
| ● a. Betul ✔  |
| O b. Salah  |
| The correct answer is: Betul  |
|   |
| Question 9  |
| Correct   |
| Mark 1.00 out of 1.00   |
|   |
| Sensor proximity bekerja dengan menggunakan prinsip pantulan sinar ultrasonik.  |
| Select one:   |
| o a. Salah ✓  |
| O b. Betul  |
|   |
| The correct answer is: Salah  |
|   |
|   |
| Question 10   |
| Correct   |
| Mark 1.00 out of 1.00   |
|   |
| Prinsip kerja dari rangkaian komparator sensor proximity adalah apabila sensor mengeluarkan tegangan lebih kecil dari<br>tegangan referensi, maka keluaran dari komparator akan berlogika HIGH. |
|   |
| Select one:   |
| o a. Betul ✓  |
| O b. Salah  |
|   |
| The correct answer is: Betul  |

| Question 11  |
|--|
| Correct  |
| Mark 1.00 out of 1.00  |
|  |
| Fungsi sensor proximity adalah untuk mendeteksi objek.   |
| Select one:  |
| o a. Betul ✓   |
| O b. Salah   |
| The correct answer is: Betul   |
|  |
| Question 12  |
| Correct  |
| Mark 1.00 out of 1.00  |
|  |
| Sensor proximity bekerja dengan menggunakan prinsip pantulan suara ultrasonik.   |
| Select one:  |
| a. Betul   |
| o b. Salah ✓   |
| The correct answer is: Salah   |
|  |
| Question 13  |
| Correct  |
| Mark 1.00 out of 1.00  |
| Prinsip kerja dari rangkaian komparator sensor proximity adalah apabila sensor mengeluarkan tegangan melebihi tegangan<br>referensi, maka keluaran dari komparator akan berlogika LOW. |
| Select one:  |
| ● a. Betul ✓   |
| ○ b. Salah   |
| The correct answer is: Betul   |

| Correct                         |  |
|---------------------------------|--|
| 0011601                         |  |
| Mark 1.00 out of 1.00           |  |
|                                 |  |
| Sensor proximity                | dapat mendeteksi objek dalam jangkauan jarak antara 2cm hingga 30cm. |
| Select one:                     |  |
| a. Salah                        |  |
| ● b. Betul ✔                    |  |
| The correct answ                | wer is: Betul  |
| Question <b>15</b>              |  |
| Correct                         |  |
| Mark 1.00 out of 1.00           |  |
|                                 |  |
| Select one:  a. Betul  b. Salah |  |
| The correct answ                | wer is: Salah  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
|                                 |  |
